Login Page

- This is the first page to appear when the user runs the program.
- The user types their username and then clicks the "Sign In" button to access the My Albums page.
- If the user types the admin username, they will be directed to the Admin System page after they click the "Sign In" button.

Admin Subsystem
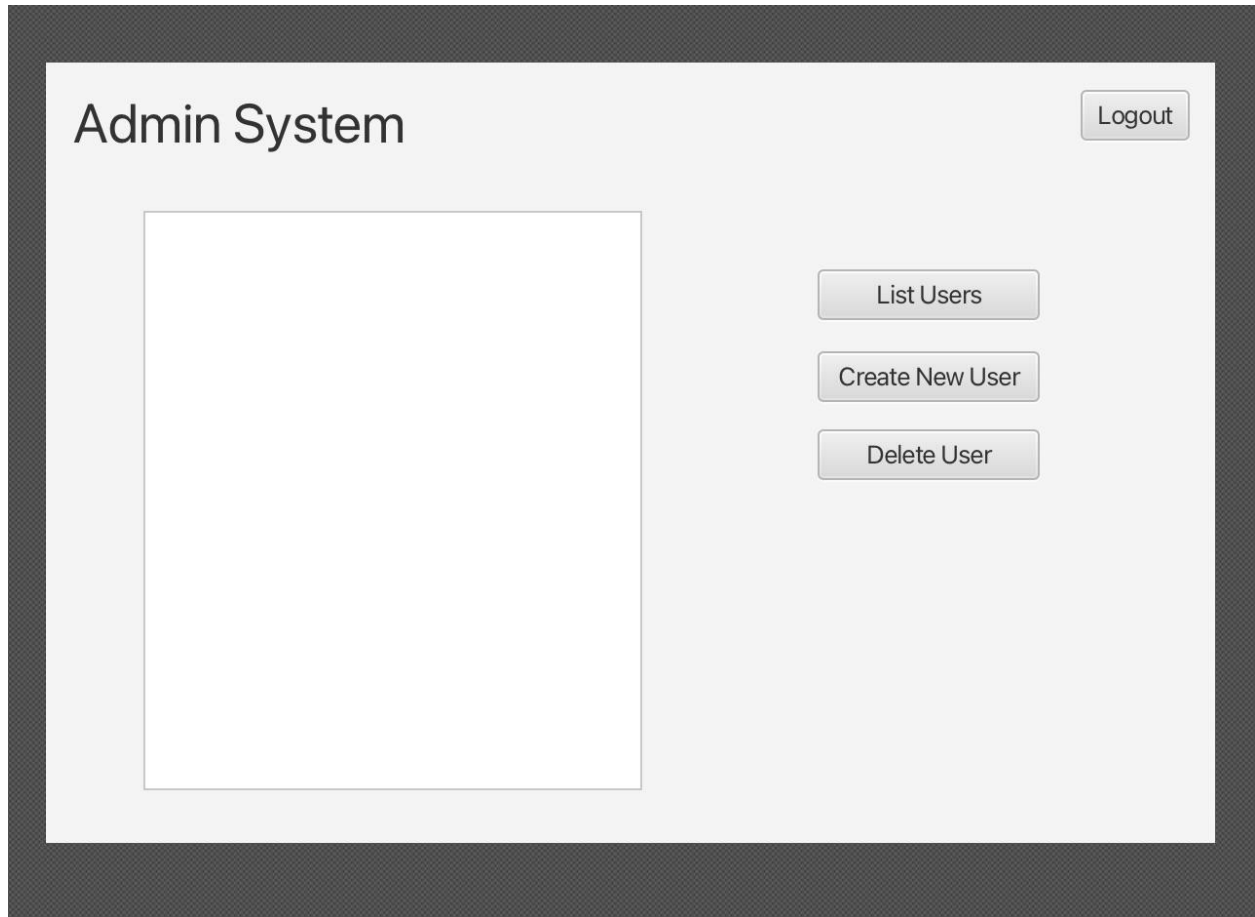

- This page appears when the "admin" username is entered into the Login page.
- When the "List Users" button is clicked, the users will be listed in the box on the left.
- The "Create New User" button will take the user to the Create New User page.
- The "Delete User" button will take the user to the Delete User page.

Create New User (Admin)

Create New User   Logout

Enter New Username: User

Add User

- After the user clicks the "Create New User" button, they are taken to this page.
- They will enter the new username and click the "Add User" button.
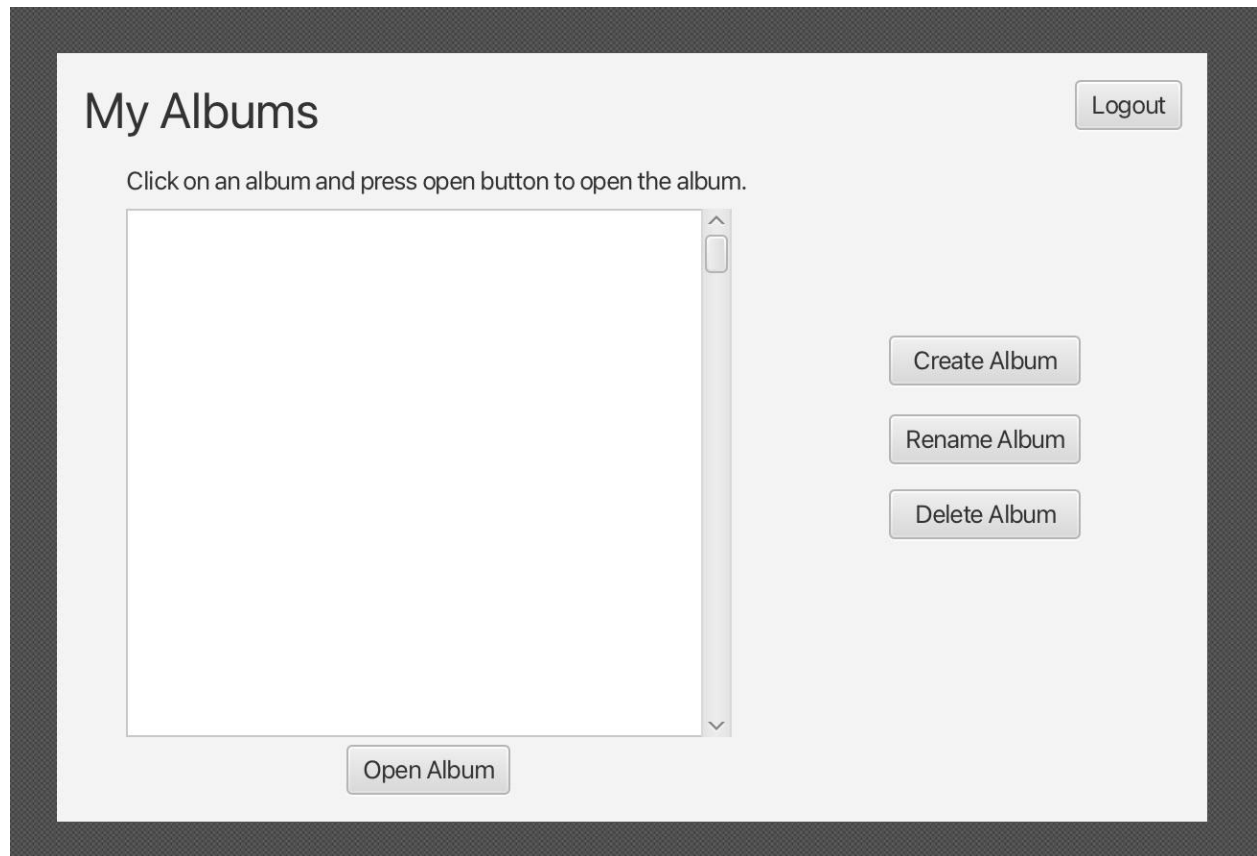

Delete a User (Admin)

Delete User

Logout
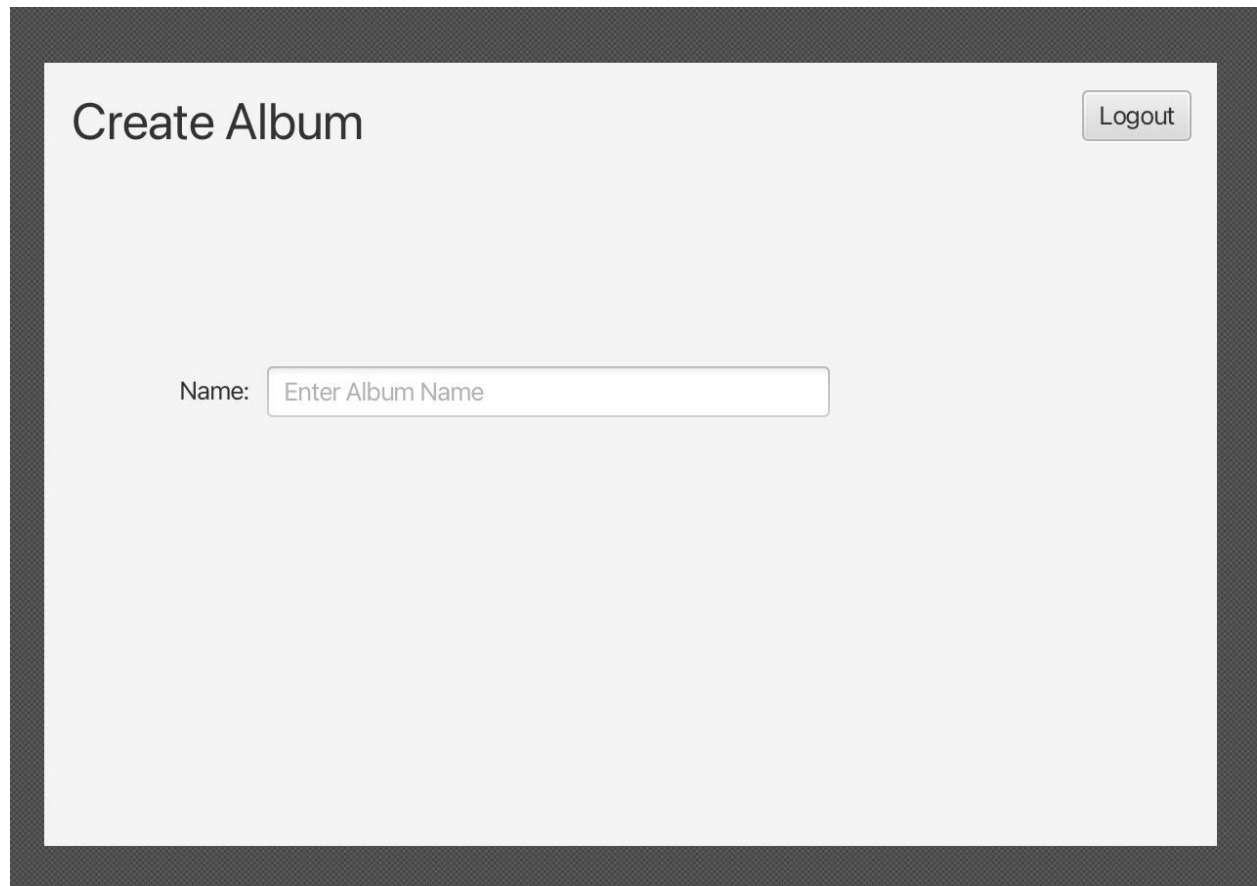

Select a user to delete from below.

Delete

- After the user clicks the "Delete User" button, they are taken to this page.
- The box will list all the current users and the user will have to click on a username and then click the delete button.

Main Album Page (Non-Admin)

My Albums

Logout

Click on an album and press open button to open the album.

Create Album

Rename Album

Delete Album

Open Album

- Once the user enters their non-admin username into the Login page, this page will appear.
- The albums will be shown in the box on the left.
- The "Create Album" button will take the user to the Create Album page.
- The user can click on an album in the box and then click the "Rename Album" button to change the album name.
- The user can click on an album in the box and then click the "Delete Album" button for the album to be removed from the box.
- The user can highlight an album and then click the "Open Album" button to view the photos within that album.
